

The voices of HB-101 users.

- Harmless to human beings, animals and soil.
- Flowers, leaves and fruits become shiny and good style.
- Noxious insects and bad fungi are almost away from plants.
- Fresh and delicious taste of fruits, vegetables and cereals.
- Crop increases more than 30%.
- Plants don't fall down by hurricane.
- Freshness after harvest become more than twice longer.
- Problems about acid rain and acid mist can be solved.
- Troubles with repeated cultivation of the same plant on the same ground don't occur.
- Degree of sweetness increases from 1 to 8 degrees.
- The plants vitalize....More Bigger, Tighter, Heavier and Earlier!
- You can cut down expense and gain more income.

(How to Use) Use from 1,000 to 100,000 times dilution by water.

1. Sprinkle HB-101 (1,000 to 100,000 times dilution) on the soil from once to 3 times between harvest and next replant.
2. Dip seeds into HB-101 (1,000 times dilution) for 12 hours. (Beans should be dipped just for a moment and leafy vegetables for three hours.)
3. Sprinkle HB-101 (1,000 times dilution) on the ground just before seeding and just before replant.
4. Sprinkle HB-101 (1,000 times dilution) on seedlings 3 times during the period of seedlings.
5. HB-101 is very cheap. HB-101 is used, 100cc per 1000m², 10cc per 100m², 1cc per 10m². (1000 to 100,000 dilution.) once a week or two weeks. (To the soil and to the leaves.)
6. In case of hydroponic cultivation, HB-101 is used 100,000 times dilution in water.
