

Nutri-Neem™ 85%

Azadirachta indica (neem) seed cold pressed oil 85%

A high quality imported neem oil that has been emulsified to allow easy mixing with spray tank water and stabilised to reduce UV degradation.

BENEFITS

- Australian Certified Organic (ACO) Registered Farm Input 456AI.
- Can be used as a natural wetter-sticker for use with foliar fertilisers (but is not registered for use as a wetter-sticker with any registered chemicals in Australia).
- This oil contains natural organic sulfur, proteins, vitamins, glycerides and numerous beneficial trace elements.
- Effective over a wide pH range.
- Neem is a recognised bio-balancer.

PACKAGING:

1 L, 5 L, 20 L
Product Code: NN

Nutri-Neem™ 85%

APPLICATION RATES

Fertigation:

Vegetables

1 – 2 L/ha, apply weekly or as required

Fruit

1 – 2 L/ha, apply monthly or as required

Foliar Spray:

1 L per 300 L water up to 2 L/ha equivalent

Do not apply in the 2 weeks prior to flowering or during flowering. Do not apply 5 – 7 days before harvest.

IMPORTANT

- It is possible to create a phytotoxic reaction if neem oil products are applied in concentrated form. Do not exceed 1:300 concentration.
- Due to high levels of natural vegetable fats, the oil may become very thick or viscous during cold weather and may clog equipment. If it becomes waxy, place container in hot water until the consistency reverts to a liquid form.
- Many of the components in the neem extract are not stable under extended UV radiation.
- Do not leave in sunlight for prolonged periods.

TYPICAL ANALYSIS W/V

<i>Azadirachta indica</i> (neem) seed	
cold pressed oil.....	85%
SG.....	0.9
Appearance.....	Golden yellow liquid

INSTRUCTIONS

Shake or stir well before use. Where higher water rates are required for good foliar coverage, do not exceed maximum product rate per hectare. If using on a crop for the first time a test should be performed on a small area at the intended dilution rate and observed for any reaction within 24 hours. If any crinkling or wilting of leaves is observed then oil will need to be further diluted and re-tested before proceeding. Frequencies are a guideline only and can be adjusted according to farm practices and/or in conjunction with crop monitoring. Ensure suitable spray conditions (e.g. temperature, humidity, wind-speed), prior to foliar application. Compatibility and/or performance cannot be guaranteed when combined with other products. Jar test for compatibility before wide-spread use.

STORAGE & HANDLING

- **Warning: Poison (S5). See Safety Directions on label.**
- Do not pre-mix or store in diluted form.
- Seal lid/cap immediately after use.

Disclaimer: Any recommendations provided by Nutri-Tech Solutions Pty Ltd (NTS) or its Distributors are advice only. As no control can be exercised over storage, handling, mixing application or use, or weather, plant or soil conditions before, during or after application (all of which may affect the performance of our program), no responsibility for, or liability for any failure in performance, losses, damages, or injuries (consequential or otherwise), arising from such storage, mixing, application, or use will be accepted under any circumstances whatsoever. NTS recommend you contact an Agronomist prior to product application. The Buyer assumes all responsibility for the use of any NTS products.
